Karol Wiśniewski

engineer.wka@gmail.com 795 738 507 Wrocław [github] [LinkedIn]

Education

- **Kent, United Kingdom Language College Centre Ashford** **2009 – 2010**
- **Polytechnic Electronics and Telecommunication Department** **2004 – 2008**
- **High School Association of Electric Schools/profile Electrotechnic** **1999 - 2004**

Certificate & Interests

I love in Wire Harness -> Data Sheets Analyzing, Correlation related to the Revisions, Building, Developing, Seeking New Solutions and Adaptations to clinet reality compliance with norms.

- PRINCE2 Foundation Level.
- Mid-Advanced Excel Training.
- **Institute PROCAD AUTO CAD. Level_2.**
- **SEP Qualification Voltage Certificate 1kV.**
- **Constructor & Tester Half-year Training Switzerland.**
- **IPC/WHMA 620-A Requirements for Wire Harnesses.**
- **J-STD001 Requirements for Soldered Electrical and Electronic Assemblies.**

- Language: Polish Native, English C1.
- Soldering, THT, SMD, BGA Replacements.
- Enova365, Nagios, SharePoint, WordPress.
- CAN, Vehicle BUS, IBIS, Automotive Ethernet.
- Multimeter, Oscilloscope and laboratory equipment.

Experience

Test Engineer

Trapeze Poland 2022 - 2025

- Performed regression, integration, component, system, functional, non-functional, and confirmation testing.
- Worked with Scrum methodology to improve project workflow and team collaboration.
- Reviewing requirements, test documentation, specifications, and functionalities.
- Using Jira for task management, time tracking, test planning, and execution.
- Monitoring test plans aligned with project goals and requirements.
- Ability to independently create and maintain test documentation.
- Knowledge of tools: JIRA, Confluence, MS Teams, Log Analyzer.
- Experience in working with requirements and their analysis.
- Passed in 2024 the ISTQB 4.0 Foundation Level Certification.
- Experience in testing embedded systems/physical devices.
- Creating and updating test cases and test documentation.
- Openness to working with technical documentation.
- Effective collaboration with developers and testers.
- Execute end-to-end system validation testing.

Python Developer
Medical Engineer
HIL/SIL
Process Engineer
Technical Leader
Test Engineer
Embedded Systems

Electronic
Electrician
Harness Expert
R&D Engineer
SW & HW House
Automotive
Project Engineer

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation)

Experience

Project Engineer
[ITS, R&D, System, Solution, Design, Wire_Expert, Integration SW&HW] *Trapeze Poland* *2012 - 2022*

- Analysis the type of electricity signal distributed.
- Selection of appropriate materials in accordance with ECE R118 and EN 45545 norms.
- I defined the scope, costs and project schedule regarding to the electrical harnesses.
- I was responsible for all processes related to electrical harnesses and decision-making.
- Visit on site in MAN, Solaris, LG Energy Solution to conduct or witness tests at client sites.
- Contact with clients to discuss technical challenges, requirements, propose best solution.
- Gaining valuable experience working with clients from both the private and public sectors.
- I created dedicated applications for cable harnesses and detailed, professional BOM - data sheets.
- Preparing project documentation, scope, cost, schedule, sample requirements, technical documentation.
- Analyzing client input, available data and product construction and searching all necessary information.
- I provided technical support and advice to clients on product evaluation, inspection, and follow-up activities.
- I created engineering documentation such as diagrams, schematics, troubleshooting guides, instructions, material approvals.
- I was developing software and hardware test requirements for electrical device unique features (Unit Testing) or repeated features (Regression Testing) requiring frequent use of independent judgment.
- Experience in business trips and work in to the United Kingdom, Germany, and Switzerland for collaboration with international teams.

Service Engineer [Medical Area] *WITKO* *2011 - 2012*

- I was working in SAP program.
- **I analysed and tested medical equipment.**
- **I'm doing periodic reviews and training for end users.**
- **I performed calibrations and tests on the laboratory equipment.**
- I was troubleshooting hardware and software issues in medical equipment.
- **I create reports and certificates that need to be provided from device qualification to the clients.**
- **In the field of Qualification, I was validating or not validating laboratory devices.**
- **I was performing measurements of humidity, temperature, velocity, pressure, light intensity, and air flow strength.**
- I made repairs and installation of laboratory equipment such as: Memmert, Votsch, Heidolph, HVAC, and HUGO SACHS.
- I provided solutions for medical devices at universities and in the private sector, such as US Pharmacia and Polpharma.
- **I Validate and Certified Devices - Installation Qualification (IQ), Operational Qualification (OQ), and Performance Qualification (PQ).**

Process Engineer & Technical Leader *SBE [U.K.]* *2009 - 2011*

- Debug printed circuit boards (PCB).
- I have performed the most advanced repairs.
- I make a calibration and software installation.
- Technical support of the service Assembling Lines.
- Training in the LG Main Office Company in London.
- Diagnosis and replacement of components and cosmetics.
- Practical knowledge of SMT, SMD, THT and IPC soldering standards.
- Create a Trouble Shooting Guide in the block steps at MS Visio - UML.
- I was managing of the group approx. 20 people on the highest level 4.
- **I performed activities in accordance with the company's quality standards.**
- **Creating Bulletins with new solutions (speeding up servicing process operation).**
- Adjusting new settings for supporting devices. Providing corrections if necessary.
- **Conducting training in English, presentations, and meetings for the new employees.**
- **I controlled the entire process, granted authorizations, and motivated people to work.**
- I have obtained authorization to repair Nokia, Apple, Samsung, LG and Sony-Ericsson motherboards.
- **Taking measurements - operating oscilloscopes, digital multimeters, power supplies, and generators.**

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation)
