Education

- Kent, United Kingdom College Centre Ashford 2009 – 2010
- Polytechnic Electronics and Telecommunication Department 2004 – 2008
- High School Association of Electric Schools/profile Electrotechnic 1999 - 2004

Certificates & Skills

- ISTQB® Certified Tester.
- PRINCE2 Foundation Level.
- Institute PROCAD Auto CAD. Level 2.
- SEP Qualification Voltage Certificate 1kV.
- Training CISCO/CCNA Routing and Switching.
- Constructor & Tester Half-year Training Switzerland.
- Soldering Requirements for Electronic Assemblies - RENEX
- IPC/WHMA 620-A Requirements for Wire Harnesses - RENEX
- Aggile aproach.
- Automated Tests. UML.
- Auto Cad & Visio Design.
- Embedded Systems, HIL. Linux.
- Language: Polish Native, English C1.
- CAN, IBIS, Vehicle Bus, Automotive Ethernet.
- Junior Python Developer. PyTest. Webdriver.
- Soldering, THT, SMD, BGA Replacements. Auto-Cad.
- Multimeter, Oscilloscope and laboratory equipment.
- JIRA, Confluence, Share-point, Nagios, X-ray, Trello.

Experience

TEST Engineer [Automotive]

Trapeze Poland 2022 - 2025

- Creating test cases and updating test documentation; ensuring that scenarios align with real product behavior and usage.
- Performing manual testing (GUI, functional, integration, installation, regression, and performance testing) to detect defects and verify fixes.
- Proposing test automation using Python.
- Documenting test projects, plans, and test results using Jira and Confluence.
- Estimating and planning test tasks, supporting the definition of test scope.
- Close collaboration with the development team and management.
- Participating in test plan reviews, QA team meetings, and project retrospectives.
- Creating and using vehicle simulators to accurately reproduce user scenarios during testing.
- Monitoring user reports and feedback and communicating them to relevant stakeholders.
- Supporting product designers by simulating user experiences and proposing UX improvements.
- (2024) Passing the ISTQB CTFL 4.0 certification, confirming up-to-date knowledge and best practices in software testing.

- 10 years of experience in the R&D domain in the following roles: System Engineer, Electrical Engineer, Electronics Engineer, Design Engineer, Tester, and Wiring Harness Expert.
- Highly developed analytical skills, strong attention to detail, and initiative in independently solving technical problems.
- Experience in designing electrical systems for the automotive industry.
- SEP certification and proficiency in the use of measurement and diagnostic equipment.
- Preparation of data sheets and catalog cards for electrical wiring harnesses.
- Development of block diagrams, functional diagrams, and UML diagrams (Troubleshooting Guides).
- Execution of test projects covering the entire lifecycle—from concept, through design, to implementation.
- Design and construction of prototypes (simulators) for vehicle software simulation and testing.
- Ability to develop Test's, design electrical installations, build prototypes and coding in Python for test Automation.
- Creation of technical documentation, such as specifications, manuals, test procedures, and reports.
- Very good command of English, with the ability to work confidently with technical documentation, also in German.
- Fault diagnosis and repair of electronic devices, covering component-level repair (THT, SMD, BGA).
- Training of end users in the operation of devices and test benches.
- Preparation of calculations and cost estimates, with cost reduction if necessary, regarding acceptable quality.
- Creation of Bills of Materials (BOM) with a strong focus on detail and document clarity.
- Design and construction of data transmission and antenna wiring harnesses, taking signal types into account.
- Experience with business travel to the United Kingdom, Germany, and Switzerland, and collaboration with international teams.

Success Delivered Projects :)

STADLER

- 2013 203pcs Displays.
- 2013 30pcs Bombardier's.
- 2014 37pcs Text to Speech.
- 2015 36pcs PESA.
- 2016 60pcs SOLARIS.
- 2016 15pcs AUTOSAN.
- 2017 32pcs SOLARIS.
- 2018 18pcs AUTOSAN.
- 2018 52pcs SOLARIS.
- 2018 86pcs MERCEDES.
- 2018 12pcs VOLVO.
- 2022 60pcs STADLER.
- 2022 10pcs MAN.
- 2022 25pcs SOLARIS.
