

Education

- | | |
|--|-------------|
| • Kent, United Kingdom College Centre Ashford | 2009 – 2010 |
| • Polytechnic Electronics and Telecommunication Department | 2004 – 2008 |
| • High School Association of Electric Schools/profile Electrotechnic | 1999 – 2004 |

Certificates & Interests

- | | |
|--|--|
| • Institute PROCAD Auto CAD. Level_2. | • Soldering, THT, SMD, BGA Replacements. |
| • SEP Qualification Voltage Certificate 1kV. | • Language: Polish Native, English C1, German A1. |
| • IPC/WHMA Requirements for wire harnesses. | • Multimeter, Oscilloscope and laboratory equipment. |

Experience

Trapeze Poland Wrocław
Test Engineer [Automotive]

2022.09.01 - 2025.08.31

Trapeze Poland Wrocław
System Engineer [Automotive]

2012.06.01 - 2022.08.31

- Very good knowledge of MS Excel.
- Experience in designing cable harnesses.
- Intermediate English language skills at C1 level.
- Experience in analysing customer documentation.
- Engineering knowledge related to cable construction.
- Creating Data Sheets and wire harness catalogue cards.
- Bachelor's Engineering Degree - Politechnika Bydgoska.
- Creating bills of materials (BOMs) with a focus on details.
- Calculation and cost estimation of wire harness production.
- Direct contact with the client to discuss project requirements.
- Identification and analysis of tools required for product production.
- General knowledge and understanding of manufacturing processes.
- Knowledge of the wire harnesses process to estimate required time.
- Selection of cables, shields, connectors, terminals, tapes, and cable ties.
- Drawing block diagrams, schematics, functional schematics, and diagrams.
- Collaboration with engineering departments to develop the product process.
- Creation of production documentation: wire cut lists, assembly instructions.
- Design of electrical wire harnesses with lengths, cross-sections, and routing.
- Design of cable routing in accordance with mechanical and thermal constraints.
- Generation of wire lists, connector lists, pin-outs, cross-section and length tables.
- Design of data transmission and antenna wire harnesses with signal considerations.
- Creating documentation compliant with standards (e.g., IPC/WHMA-A-620, ISO 60617).
- Selection of components and materials for wire harnesses construction based on requirements.
- Experience in considering cost reduction opportunities during the RFQ phase of product pricing.
- Dedicate cabling regarding environmental requirements (humidity, temperature, oils, vibration).
- Selection of connectors (e.g., TE, Molex, Delphi, JST, Harting, etc.), pins, terminals, and crimping tools.
