Wrocław

[github](#)

A dynamic and results-oriented engineer with extensive experience in Intelligent Transport Systems. I was collaborating with contractors, subcontractors, and all stakeholders. My experience teaches me how to effectively collaborate with various departments and individuals.

Education

- | | |
|--|-------------|
| • Kent, United Kingdom College Centre Ashford | 2009 – 2010 |
| • Polytechnic Electronics and Telecommunication Department | 2004 – 2008 |
| • High School Association of Electric Schools/profile Electrotechnic | 1999 - 2004 |

Certificates & Skills

- | | |
|--|---|
| <ul style="list-style-type: none">• PRINCE2 Foundation Level.• Institute PROCAD Auto CAD. Level_2.• SEP Qualification Voltage Certificate 1kV.• Certificate Radiocommunication Systems.• Training CISCO/CCNA Routing and Switching.• IPC/WHMA Requirements for wire harnesses.• ISTQB® Certified Tester, Exam Passed 25.10.2024.• Constructor & Tester Half-year Training Switzerland.• Training Requirements for soldering electronic packages. | <ul style="list-style-type: none">• Polish Native, English C1.• Programming in Python.• Logs and Telegrams Analysis.• Basic HTML, CSS and DevTools.• CAN, Vehicle BUS Protocol, Ethernet.• Embedded Systems. Automated Tests.• Outside the box thinking. Agile approach.• Strong Communication. Good team player.• JIRA, Confluence, Sharepoint, Enova365, X-ray.• Measuring Instruments - Multimeter, Oscilloscope. |

Experience

Test Engineer
Trapeze Poland

2022 - present day

- Backlog management and prioritizing task.
- Cooperate effectively with developers and testers.
- Developed and added new test cases to improve test coverage.
- Monitor test plans focused on the projects goals, requirements.
- Requirements, Test Documentation, Feature Specification Review.
- Managed setup, installation, and configuration of test environments.
- Handling tests in response to reported defects, issues, and incident reports.
- Hardware and software integration testing to ensure the system works properly.
- Using Jira for task management, time tracking, test planning, and test execution.
- Work in Scrum methodology to enhance project workflow and team collaboration.
- Modified XML configuration files, services, databases, and radio connection setups.
- Supported operating systems including Windows 7, Windows 10, and Windows Embedded.
- Stabilized test facilities through fixing, updating, upgrading, and migrating hardware and software.
- Providing modifications in Test Replicas, Simulators, Wire Harnesses, and Special Hardware for Clients.
- Executed various testing types including:

Regression, Sanity, Integration, Module, System, Functional, Non - Functional, Confirmation Test.

Business Development

- Established and maintained business relationships.
- Analyzing the problems, situation, and fitting the strategy to solve it.
- Organized stakeholder meetings and conducted formal presentations.
- Selecting business vendors and design partners to support project requirements.
- Collaborated closely with the Sales Department to align business goals and strategies.
- Gained valuable experience working with clients across both private and public sectors.

Project Management

- Verified customer requirements to ensure alignment with project scope.
- Cooperate effectively with customers, suppliers, developers, and testers.
- I was engaged in design and concept workshops with cross-functional teams.
- Participated in Factory Acceptance Tests (FAT) and Site Acceptance Tests (SAT).
- Prepared project documentation, simple calculations, and executive summaries.
- Monitored project progress at every stage to ensure timely and efficient implementation.
- Managed project input resources and control of integration with contractors and subcontractors.

Customer Support

- Organized remote and on-site training sessions for engineers and end users.
- Provided both warranty and post-warranty hardware and software maintenance services.
- Coordinated with corporate partners to deliver customized solutions tailored to customer needs.
- I maintained direct communication with all project stakeholders, including regular on-site visits.

Research & Development (R&D)

- I conducted functional and performance testing of customer hardware.
- Designed, constructed, and modified simulators for tram and bus vehicles.
- Design and implement product strategy to migrate from Old Approach to New.
- Modernization and implementation of innovative solutions for client hardware.
- Developing and implementing hardware and software solutions for new products.
- I am creating a specific wire-harness application and detailed professional datasheets.
- I build wire harnesses in accordance with IPC/WHMA-A-620, ECE R118, and EN 45545 norm.
- I implemented network configurations for testing in both production [vehicle] and laboratory environments.
- I created engineering documentation such as diagrams, schematics, concepts, troubleshooting, guides, manuals, and material approvals.

Success Delivered Projects :)

- 2013 Commissioning Displays Passenger Information 203pcs.
- 2013 Implementation of Software & Hardware 30pcs Bombardier's.
- 2014 Integrated Software & Hardware in Displays with 37pcs Text to Speech.
- 2014 Implementation and Commissioning Software & Hardware 196pcs Trams.
- 2015 Implementation and Commissioning Software & Hardware 36pcs PESA.
- 2016 Implementation and Commissioning Software & Hardware 60pcs SOLARIS.
- 2016 Implementation and Commissioning Software & Hardware 12pcs SOLARIS.
- 2016 Implementation and Commissioning Software & Hardware 15pcs AUTOSAN.
- 2017 Implementation and Commissioning Software & Hardware 32pcs SOLARIS.
- 2018 Implementation and Commissioning Software & Hardware 18pcs AUTOSAN.
- 2018 Implementation and Commissioning Software & Hardware 52pcs SOLARIS.
- 2018 Implementation and Commissioning Software & Hardware 86pcs MERCEDES.
- 2018 Implementation and Commissioning Software & Hardware 12pcs VOLVO.
- 2022 Implementation and Commissioning Software & Hardware 60pcs STADLER.
- 2022 Implementation and Commissioning Software & Hardware 10pcs MAN.
- 2022 Implementation and Commissioning Software & Hardware 25pcs SOLARIS.

STADLER
